Introduction

Your Vedic Astrology Report consists of 4 sections: an interpretation of the Moon nakshatra and Moon sign, an analysis of yogas, a third section that describes various specific astrological influences in your chart, and an appendix of technical details. Fortunately, you do NOT need to be an astrologer or know what a "Moon nakshatra" is to read this report! If you are an astrologer or student of astrology, the astrological details are described as well, and you can easily skip over these technical astrological details if they do not interest you.

In this report there are quotations from the following books:

"Yogas In Astrology" by Dr. K S Charak, 1999, published by UMA Publications, 72 Gagan Vihat, Delhi-110 051, India

"Three Hundred Important Combinations" by B.V. Raman, 1997, published by Motilal Banarsidass Publishers Private Limited, Delhi, India

"Constellational Astrology" by Robert De Luce, 1963, De Luce Publishing Company, Los Angeles, CA, USA

If you are interested in learning Vedic astrology, we highly recommend these 3 books. Only small sections that are relevant to a particular astrological influence have been quoted from these books. These works are based on the ancient Vedic writings (the Vedas) and have been elaborated upon and explained in terms that make sense for modern people. "Constellational Astrology" is no longer in print, but the other two books can be

purchased.

Important: The interpretations in this report are based on the ancient system of Vedic astrology. Many of these interpretations are fatalistic and some are even extreme, frightening, and are now known to be not literally correct! You should interpret the influences described here in more psychological and general terms. Do not take the statements given in this report literally! The extreme and definite interpretations in this report should be viewed as indicating psychological tendencies rather than absolute facts. Also, modern astrologers believe that there is a negative and a positive potential in any astrological influence. Even the most difficult astrological influence can be handled successfully, and an astrological influence that might seem beneficial can be mishandled. Astrologers do claim to be able to describe the important issues and themes in your life, but what is good or bad is mostly up to you.

Section I: The Moons Nakshatras and Rasi

Nakshatras are also known as lunar mansions. There are 27 nakshatras, and each one has a length of 13 degrees and 20 minutes. The nakshatra position of the Moon is very important in Vedic astrology. Given below is the meaning of the Moon's nakshatra and Moon sign (rasi) in your chart.

Moon in 25th nakshatra:

The Moon is in Purva Bhadrapada, the twenty-fifth nakshatra (20 degrees of Aquarius to 3 deg 20 min of Pisces). You are clever and you know how to manipulate situations to your advantage. Very likely you are successful, but a tendency to be overly concerned about your own well-being and security and insensitive to others can result in relationship problems. For example, your spouse may be constantly criticizing you.

Moon is in Aquarius rasi:

According to De Luce: "The native will have a long neck like that of a camel (the Sanskrit term is figuratively used for a man who is not true to his promises one who can twist his neck any way); will have a muscular body, rough and covered with hair (lacking refinement, more bestial than human, representing man's animal nature); will be tall (so also aspiring); will have large feet, thighs, back, buttocks, face and lower belly (endowed with native understanding); will be deaf (hard-hearted); will be addicted to other men's wives; utilize the wealth of others and commit sinful deeds (anti-social, defies convention); will have pecuniary losses and gains (instability, unsettled in his mind); will be fond of flowers and perfumes (desires Venusian pleasures); and will walk without tiring (indefatigable zeal to accomplish his own objectives). (Note: Keep in mind that in ancient Hindu astrology, Aquarius is ruled by Saturn only.)"

Section II: Yogas

You may be familiar with the word "yoga" as referring to various physical exercises and postures. The word "yoga" has a very different meaning as used in astrology and does not refer to physical exercises. The word yoga literally means "combination". This section of your report describes important combinations of astrological influences that produce specific results.

Kemadruma Yoga

Kemadruma yoga occurs when there are no planets in the 2nd and the 12th house from the Moon.

According to Raman: "The person will be dirty, sorrowful, doing unrighteous deeds, poor, dependent, a rogue and a swindler." According to Charak: "One born in this yoga is bereft of health, wealth, learning, wisdom, wife, progeny and mental peace. This yoga is said to reduce to a pauper even one born in a princely ambience. Such a native suffers misery, failures, physical illness and humiliation." Remember that ancient Vedic interpretations are not literally true! Any astrological influence can also be positive.

Kemadruma Yoga cancellation, with Lagna

Planets in kendra (1st, 4th, 7th or 10th) house from Lagna cancel the effect of Kemadruma yoga.

APPENDIX

Vedic astrology is an ancient system of astrological analysis practiced by many thousands of astrologers over the centuries. Vedic astrology, like modern western astrology, has not been validated scientifically, and you should think critically about the information provided to see if it appears to be accurate and relevant. No astrological information should be blindly believed in. Astrology simply lacks the scientific proof that established sciences have. On the other hand, many people have found astrology to be useful and helpful.
