### \*\*\*\*\* Introduction \*\*\*\*\*

This report is designed to serve as a guide in finding your true vocation. At the same time an analysis of your personal characteristics, strengths or inhibitions, unused potential, karma, creativity, ability to earn money, work in relation to your employment etc., is given. At the end you will find a synthesis of the foregoing that will help you to summarize and clarify your mission in this life. Throughout this report numerous indications of possible vocations or professions related to your astrological influences are outlined. It is suggested that you reflect on this information so that in the end your own intuition can lead you to the best selection.

\*\*\*\*\* Chapter 1 \*\*\*\*\*

**Your individuality. Your personality.  
Your emotional needs. Your mentality.**

To find the ideal profession, you have to know yourself first. There are activities you are suited for according to your nature, and others you are not. Your ideal occupation should favor the expression of your individuality (Sun) and your personality (Rising Sign), satisfy your emotional needs (Moon) and permit the development of your intellect (Mercury).

*YOUR INDIVIDUALITY: Sun in Virgo*

You were born under the sign of VIRGO and your ruling planet is Mercury, which endows you with outstanding mental qualities.

Your Sun sign is MUTABLE and this will impel you to function as a COMMUNICATOR, either in thought or action. You won't feel comfortable in a leadership position, but rather in a subordinate position or service. One of your functions is to help others to solve their problems.

Virgo is an EARTH sign and this makes you realistic, practical and concrete. You will have a strong desire to accomplish material goals and need to feel that your career or enterprises permit you to grow a little more each year.

You are shy, intelligent and analytical and want to have everything in order in your surroundings. You have a strong practical sense of life and can easily solve your problems and tasks. You are very responsible and industrious, but may lack a sense of pride. Waiting for recognition from others could result in deceptions and could easily hurt your feelings. You give excessively to others and because of this you forego many of your personal ambitions.

Your natural shyness allows you to have a very rich inner life with very deep feelings. You are very loyal with your friendships; they probably will not be many, but they will be lasting. You have great ability to analyze, see the details of each situation and want to make everything perfect. You are very demanding with yourself and your nervousness could affect your health.

You were born to study, to develop your intelligence, to organize, to solve problems, to put in order, and mainly, to serve. One of your missions is to see that those around you discover and develop their potential. Your ability to analyze and see the details will teach others to be more penetrating and try to do things in a more perfect manner. You were born to cure, to alleviate and solve material problems as well as those involving health.

To evolve, your spirit needs to learn to develop greater self-confidence. You will have to conquer your fears, your insecurity and the shyness that immobilizes you at times, as well as the tendency to hypochondria, to generate your health problems and to limit your own freedom. You should avoid skeptical, somber and cold attitudes, or the tendency to exaggerate, criticize and be negative. The expression of your personality could be limited by hysterics and diseases or the tendency to think too much about things and not to act on them.

*YOUR PERSONALITY: Ascendant Pisces*

Others see you as a sensitive, intuitive and very obliging person. You always are ready to listen and to offer compassion, sometimes foregoing your own occupations.

You are romantic, idealistic and dreamy. It is hard for you to see things as they really are. You tend to idealize others and are disillusioned most of the time. You have a tendency to evade your problems and to be very disordered in the material area. You have to learn to put order in your surroundings and to realize your goals without requiring so much external help. Because of your great sensitivity, your feelings are hurt very easily and tears may come to your eyes at the drop of a hat. You have an immense emotional world and are very loving. Your powerful intuition gives you the ability to detect the feelings of other people. You are a counselor and psychologist by nature, but have to learn not to load yourself down with others' problems.

The profession you choose will have to stimulate your love for all living beings, your eagerness to help, cure, serve and collaborate. You need to feel that you are useful and that others need you. Avoid mechanical, cold or very materialistic professions.

#### *YOUR EMOTIONAL NEEDS: Moon in Pisces*

Your emotional world is very intense and it is difficult for you to be rational or cold. You are very sensitive and tend to shed tears at the drop of a hat. In difficult situations you are likely to view yourself as the victim and need the help of others to go on. You are evasive and afraid of conflicts. You prefer to discuss things quietly and believe that problems will take care of themselves later on. You have to surround yourself with positive people, because you are extremely receptive to the energy around you. You have to learn to discriminate and to separate your problems from those of others, and also not to take to heart what others say.

You are very dreamy and most of the time don't see others as they really are or fail to recognize your own limitations. Your idealism inclines you to see only the best, and afterwards you may feel deceived or disillusioned. You are a humanitarian and react to the pain of others with compassion and protectiveness. You are able to endure a lot and have a tendency to identify with your loved ones. Through your high degree of inspiration you could excel in literary or artistic activities.

Subconsciously, you have a strong desire to find protection and safety. In previous lives you may have been shut in most of the time in a convent, hospital, monastery or other institution, learning to have a regulated life and to depend on that. From within you have developed an idealized vision of life that perhaps was not in agreement with reality. In this incarnation you have to learn to solve your material matters and at the same time to pay attention to the different needs of your existence. You have to avoid the tendency to seek isolation each time you have to face problems or to feel friendless when you are alone. On the other hand, your religious faith is important and illuminating to you. Avoid tormenting yourself with ideas of sin and punishment in order to see with more clarity what God or life wants to teach you through what touches your life.

The profession you choose will have to satisfy your emotional need to feel useful to others. You need to know that you heal, help, serve or solve others' problems and because of this, you are needed. You want to express your universal love and your philanthropy, and at the same time need to feel that you are wanted and accepted.

#### *YOUR MENTALITY: Mercury in Leo*

Your mind tends to be dynamic, intense and rigid. You are decisive and proud of your ideas; you are persevering and could become stubborn and inflexible if someone contradicts you. You like organizing and leading others. You put much energy and enthusiasm into your plans, which

will generally be sound and successful. You want to know everything about everything and also like to be known and because of this, you can be a bit vain and arrogant.

Your way of communicating is frank and open. You will show your emotions and thoughts, though you may exaggerate and act out everything theatrically to make your experiences more dramatic and thus get everybody's attention. You have a great sense of humor and creativity which gives you the ability to excel in any job that calls for contact with the public. You tend to learn and study more if you are challenged or if your personal pride is affected. You always want to be number one and put all your energies into that. You could get angry quite easily and tend to be aggressive in defending your honor. Strengthening your ego and self-esteem would help you to become very successful.

\*\*\*\*\* Chapter 2 \*\*\*\*\*

**Your abilities and your emotions, inhibitions and strengths.  
Hidden talents or challenges, Karma.**

The location of the planets in the houses and the relationship between them can increase or decrease their power. Aspects of the Sun are related to our strength and those of the Moon affect the emotional world and are expressed on a subconscious level.

Aspects that affect your INDIVIDUALITY:

*Sun in 6th house:*

You are very industrious, well-organized and efficient. You will excel in your work through your ability and dedication. You like to do things well and are likely to be a perfectionist in everything. Analyzing every detail of a situation, you have the ability to see what others miss. You will have to control the tendency to criticize and to be always unsatisfied because of your love of perfection. Though you understand authority, your success is more related to work done in a subordinate position rather than independently.

Your interest in health and hygiene of the body would make you suitable for occupations in the fields of medicine, nursing and nutrition or service in general, especially if you are born under a water sign.

This position could generate a certain shyness or lack of self-confidence. Recognition of your work may be sparse, which in the long run may lead to deceptions or frustrations while you wait for approval and gratitude. You will have to act more confidently and demand, for example, the remuneration commensurate to your work and the responsibilities you assume.

*Sun Conjunct Pluto:*

You usually are in control of every situation because of your firm and honest opinions. You like to have control and tend to manipulate others to achieve your objectives. You have to learn to avoid selfishness, intolerance and inflexibility, otherwise you could become tyrannical and authoritarian with others. Throughout your life you may experience deep and total changes that will put your capabilities and strength to test.

*Sun Sextile Neptune:*

Your great imagination and inspiration enables you to excel in any artistic area, especially music. Your sensibility and perception of the world need to be channeled and expressed and because of this, you can do well in poetry, song and dance etc.

You have a very romantic and idealistic vision of life and are very much satisfied with the accomplishment of your fantasies. As a visionary, you can formulate projects or successful enterprises; it is necessary that you have confidence in your own ideas, although at times they may seem illogical or impossible to you. Your spirituality will be another important source of inspiration.

Aspects that affect your EMOTIONS:

*Moon in 1st house:*

Very magnetic and popular, you can be successful working with the public. On the other hand, you also could be exposed to criticism, gossip and envy.

You are very sensitive, emotional and imaginative. Everything depends on how you feel; thus your mind and your mood tends to change frequently. You are active and restless and constantly need to be on the move, which is apt to bring many variations in the course of your life.

*Moon Square Saturn:*

You are inclined to feel that life is difficult. Because you take on more than your share of responsibilities, you may have difficulties solving your problems. There is a tendency to emotional inhibitions, insecurity and fear of frustration, which could lead you to limit your personal ambitions. You have to overcome your inner limitations and express more openly your longings and emotions.

*HIDDEN TALENTS: Aquarius on 12th house cusp*

You tend to neglect your creative abilities and your originality. You are likely to be very dependent and unsure about expressing your opinions, especially when they are contrary to those of others or very fanciful. You have to learn to show your opposition and also your most unusual side of your personality. Totally complying with the rules and regulations could annul a large part of you. You have to develop your creative and artistic ability and channel your inspiration more toward things that interest you without waiting for approval from others.

You could be drawn into serious problems due to the negative influence or dishonesty of some friend. You will have to avoid participating in very closed groups, political parties or groups that show fanaticism in their ideas, because later on you could find yourself committed to them and unable to avoid them.

**\*\*\*\*\* Chapter 3 \*\*\*\*\***  
**Expansion (Jupiter) and retraction (Saturn).**  
**To give and to receive.**

*EXPANSION: Jupiter in Libra*

Your sense of expansion manifests through moderation and harmony. You like to advance in a progressive and gradual way. Since childhood you have learned to see beauty everywhere. You are elegant and delicate; your friendliness attracts others and makes you very popular. You have a strong sense of justice and always defend the rights of others, even when it is not requested. Your search for inner balance could lead to excesses and also make you indecisive at times. This influence is very favorable for any kind of association. Your material success depends on being in touch with the public.

*Jupiter in 8th house:*

You are well qualified to handle money for others or yourself. You could excel in business management, accounting or banking. You may receive money or possessions through marriage, inheritances or gifts that will expand your material situation. Your material expansion is related to your ability to organize or transform your life as well as that of others.

*Jupiter Sextile Mercury:*

You have the ability to organize and plan enterprises. Travel and any activity that helps to expand your mind is very rewarding for you. Communicating and learning foreign languages is easy for you.

*Jupiter Conjunct Neptune:*

You have a fertile imagination that can be expressed in numerous creative fields. You have to watch a tendency to be excessive. Use your musical, artistic and visionary inspiration. You are congenial and idealistic and may be drawn to the religious and mystical world. You may live in a world of fantasy unwilling to face your daily problems.

*Jupiter Sextile Pluto:*

You are enthusiastic and exuberant, and the energy you display is contagious to others. You have great organizational skill, and you can be most productive in professions that relate to business, politics or education. You are interested in practically everything, so there is no limit to your possibilities. You are constructive and positive and can achieve great success in life.

*RETRACTION: Saturn in Sagittarius*

The inhibition principle affects the expansion of your intellectual field. You are conservative in many areas of your life, believing only in principles that have been proven long ago. You have a serious approach to religion, philosophy and higher education. Independent and capable, you search for justice and truth. You are intellectually disciplined and have good powers of concentration, which allows you to earn what you achieve through hard work and application. Your reputation and social status is very important to you. You could be a good teacher, speaker or political leader. You can be easily hurt and show strong resentment when accused unjustly.

*Saturn in 9th house:*

You have a cautious and conservative vision of life. You are careful and achieve everything in your life with preparation and hard work. You have a systematic approach to problems and seek practical solutions. You can become a little structured in your way of thinking and could be successful in sciences and mathematics. With this astrological position you would also be a good teacher, scientist or metaphysician. Although you may have a desire for long trips and foreign countries, you may have difficulties and delays achieving them. Your greatest frustration will be that of not reaching the academic level you long for or that of not being able to visit distant lands that you yearn for.

*Saturn Square Moon:*

Emotional injuries from the past may hinder you from enjoying your work. You have to learn to listen to yourself and to heal injuries that you are still holding inside. The search for approval and anxiety are signs of those injuries that are not yet healed. In general, you want to prove to others that you are useful and capable, but this generates a pressure that only complicates things or inhibits you still more. You have to learn to loosen up emotionally, to act without fear of making mistakes, and to concentrate more on the people who surround you. Accept your mistakes as part of growing up.

*Saturn Trine Venus:*

You are reserved, not very demonstrative with your affections, and tend to be very frugal with money. You probably will not have many friends, but the few friendships you maintain will be very lasting. You are attracted to people who take life seriously, and you communicate better in smaller groups than in large ones. Your finances are likely to be stable and you work with all the energy at your disposal to overcome every problem that may arise. You tend to work with love and responsibility in your profession.

*Saturn Trine Uranus:*

You have willpower, initiative and endless determination. You combine your practicality with intuition and need to work with freedom. You have a lot of common sense, good administrative ability, and you are persistent in your objectives. You are endowed with an inner balance between old and new, authority and your own freedom. You fulfill your duties with responsibility, but stress your own independence. You direct your creative energy efficiently and are likely to be a tenacious and hard worker.

Success in life depends to a great extent on the balance between giving and receiving, expanding and retracting. Even dwelling on the one and only failure you may have had is like not attempting anything.

**\*\*\*\*\* Chapter 4 \*\*\*\*\***  
**Finances, source of income.**  
**Work in relation to your employment.**

Described below are some possible sources of income. They may coincide, or not relate at all to your professional vocation.

*FINANCES: Aries on 2nd house cusp*

Your own ideas and initiative will enable you to make money, but first you will have to learn to use your energy more efficiently. You have a tendency to squander or to spend money impulsively. Because of this, you are likely to have times of tension and financial headaches. You may also run into financial problems by helping others, by your generosity and the tendency not to weigh your expenses. You are protective by nature and don't think of the consequences at the time of giving.

You could easily earn money offering some type of service, occupying a position of authority or conducting your own business.

*Mars in 2nd house:*

You have many ambitions and work intensely to obtain your material goals. If your expectations aren't met immediately, you can become very nervous and impatient. You can earn well in activities that require physical strength such as sports or those related to machines or metals, or in hazardous jobs such as police, firefighter, or military. You like those enterprises that challenge your capacity, where you can make use of your physical energy. You are much happier obtaining everything you want through your own effort and work. You also have a tendency to spend freely and are most generous to others. You have to learn to be more careful with money, otherwise you will be prone to financial crisis.

*WORK IN RELATION TO YOUR EMPLOYMENT: Leo on 6th house cusp*

Your work in relationship to your employment will be expressed through your creativity and great enthusiasm about your work. You are ambitious and want to progress, but are likely to seek approval and recognition from your superiors, which could bring disillusion if you don't receive it. You tend to impose your opinions and ideas on others, which could lead to some tension with your co-workers, if you don't have a leading position.

*Sun in 6th house:*

You take pride in your achievements and tend to stand out in your occupational position. You project by your personal ability and by the energy you put into your work. In general, you would like to have your own business and be independent, but you may have a certain complex or inhibitions that cause you to feel more comfortable working for an important company. This placement promises higher positions in your work. If you don't obtain one, a natural authority between your co-workers could bring some problems.

*Mercury in 6th house:*

You are contented if your work place stimulates your ideas, imagination and communication, especially jobs related to publication or means of information. You need to express your thoughts and like to feel that you are in a place where you can continue to learn and grow intellectually. This placement favors communication with your co-workers and superiors in general.

Because of your very special charisma, you are likely to become the mediator if problems arise in your working environment. To enjoy your work, you need peace, calmness and beauty around you.

*Uranus in 6th house:*

You are very nervous and rebel working for others. You need to feel free expressing your ideas and creativity, and a none-routine job, otherwise you will resign and easily change jobs. Because of your unconventional attitude, you are likely to be misunderstood or criticized by your superiors and co-workers. With this placement you tend to perform better working for yourself than for others.

*Pluto in 6th house:*

You have a lot of energy, enthusiasm and ability to face any problems in your work area. You have leadership ability and may have a position of authority. You tend to impose your ideas on others and achieve your objectives through manipulation. This placement can generate strong rivalries or fights with superiors or co-workers. Avoid violence and learn to work with more patience and flexibility.

**\*\*\*\*\* Chapter 5 \*\*\*\*\***  
**Your creativity and recreational activities.**  
**Other skills and hobbies.**

Hobbies are also part of our personality and through them, we express to a great extent our creative ability. It is important to enjoy our leisure activities and to complement them with our work or profession to reach greater balance. In our culture, we tend to place importance only on that which brings us money, thereby neglecting the expression of important parts of our personality.

*YOUR CREATIVITY: Cancer on 5th house cusp*

Your favorite recreational activities will be those that bring you in touch with nature. You enjoy peaceful activities, a gentle or intimate retreat. Your pastimes may include: animal breeding, gardening, cooking etc. If you choose a sport, it will have to be peaceful such as boating or playing golf. You also enjoy working in your household. Your creativity will be stimulated by music. If you play a musical instrument, you will be able to channel and express your inspiration and emotional world. If you don't have any musical abilities, listening to music will help you to find peace and harmony.

**\*\*\*\*\* Chapter 6 \*\*\*\*\***  
**Your vocation, profession, probability of success and  
social recognition.**

*Sagittarius-Capricorn MC (15 to 30 degrees Sagittarius)*

Your destiny is associated with the earth, the country, the trees and the plants. Beyond your idealistic love of the earth, you have a desire to possess it and to cultivate it. If you don't have your own land, you surely will be working at an occupation related to agriculture. You could suffer a lot working in an office or any place but the outdoors. You prefer a humble job, but with the possibility of being outside and free. You have great ability to work with wood and clay. The conventions of society may lead you into administrative or clerical jobs, which will make you feel frustrated. You will have to experience some disappointing job situations in order to define your ambitions and preferences more clearly.
